

Yale

Inline Patio Door Lock

- 6 full stainless steel bi-directional security hooks
- Stainless steel faceplate
- Anti-slam as standard
- Profile specific one piece keep

Manufactured by Yale, this inline patio door lock has been established in the market for many years and offers six fully stainless-steel bi-directional security anti-lift hooks with the option for shootbolts to provide additional security.

Featuring 16mm stainless steel faceplate, 20mm backset and PZ92mm centre case, and with anti-slam properties, this patio lock is suitable for a wide range of profiles including PVCu and selected aluminium doors. One piece keeps are profile specific ensuring a perfect fit.

The Yale Patio Door Lock has undergone rigorous testing. The lock is security tested and PAS 24 compliant and is recognised and accredited by the Secured by Design initiative. The lock has been corrosion-resistance tested to BS EN 1670:2007 Grade 4 and deemed to provide very high protection.
