

**EXCEEDING INDUSTRY
STANDARDS WITH**

PAS 24 CERTIFIED SECURITY

BS 3621 is a well-recognized British Standard for thief-resistant locks, often required by insurance providers to ensure adequate home security. However, at Windows Trade Plus, we believe in going beyond the minimum standards to provide the highest level of protection for your home.

That's why we manufacture with PAS 24-certified hardware across all our products, surpassing the security requirements set by insurers. PAS 24 is the benchmark for enhanced security performance, ensuring that our doors and windows offer superior resistance to forced entry and burglary attempts.

UNCOMPROMISING SECURITY STANDARDS

At Windows Trade Plus, security is not just a feature - it's a priority. Our products exceed standard security expectations by integrating the latest innovations in locking technology and high-performance materials. We rigorously test our hardware to ensure it withstands real-world attack scenarios, giving homeowners the ultimate peace of mind.

Why Choose Windows Trade Plus?

We don't just meet industry standards - we exceed them. Every product we manufacture is designed with maximum security and durability in mind. If a specific customer requests mean a particular requirement cannot be met, we provide clear guidance on potential security implications.

Industry-Leading PAS 24 Hardware

Our commitment to security excellence is reflected in the superior hardware and material options you can choose from and use within your selected doors and windows.

UPVC Doors:

Our UPVC doors are designed with state-of-the-art security features, ensuring maximum protection for your home:

PAS 24 Advanced Multi-Point Locking Systems - Engineered to meet PAS 24 and BS6375 security standards, providing enhanced resistance against forced entry.

Anti-Snap, Anti-Drill & Anti-Bump 3* Cylinders - High-security 3* euro cylinders designed to resist common break-in techniques, including snapping, drilling, bumping, and picking.

Reinforced Panels - Extra durability to withstand impact and forced entry attempts.

Strengthened Frames & Sashes - Adds extra strength to withstand impact and forced entry.

Secure Door Thresholds - Prevents levering attacks and improves weatherproofing.

Toughened & Laminated Glass Options - Provides enhanced security and shatter resistance, reducing the risk of break-ins.

PAS 24 Advanced high security handles and hinges across our door ranges as standard.

Composite Doors:

Built for superior strength and resilience, our composite doors offer unmatched security:

-  PAS 24 Heavy-Duty Multi-Point Locking Mechanisms - High-performance locking systems that engage at multiple points along the frame for superior security.
-  Solid-Core Construction - A dense, impact-resistant core that provides exceptional strength against forced entry.
-  Anti-Manipulation Locking 3* Cylinders - Designed to resist picking, drilling, and bumping, offering top-level security.
-  Strengthened Outer Frame - Reinforced for added protection against attempted break-ins.
-  PAS 24 Advanced high security handles and hinges across our door ranges as standard.
-  Secure Door Thresholds - Prevents levering attacks and improves weatherproofing.

Patio Doors:

Our patio doors combine security and style without compromising on performance:

-  High-Security Multi-Point Locking Systems - Ensures doors remain secure against forced entry.
-  Anti-Lift Technology - Prevents burglars from lifting and removing the doors from their tracks.
-  Toughened or Laminated Safety Glass - Provides increased resistance to breakage while ensuring safety in case of impact.
-  Reinforced Aluminium or Steel Tracks - Strengthens the door's structural integrity and prevents bending or distortion.
-  Internally Beaded Glazing - Prevents glass from being removed externally, adding an extra layer of security.
-  PAS 24 Advanced high security handles and hinges across our door ranges as standard.

UPVC Windows

Our UPVC windows provide the highest level of security and durability:

-  PAS 24 Certified High-Security Locks - Designed and tested to resist forced entry attempts.
-  Internally Glazed for Maximum Protection - Prevents glass removal from the outside, keeping intruders out.
-  Strengthened Frames & Sashes - Adds extra strength to withstand impact and forced entry.
-  Key-Locking Handles & Shoot bolt Locking - Additional layers of security to prevent break-ins.
-  Optional Toughened & Laminated Glass - Further enhances impact resistance and security.
-  PAS 24 Advanced high security handles and hinges across our window range as standard.

More Than Just Compliance - Raising the Bar for Security

Windows Trade Plus goes beyond industry norms by incorporating only the highest standard of security hardware. Our PAS 24 certified hardware ensures that every window and door we supply is built to resist even the most determined intruders, offering superior protection that exceeds insurance company expectations.

Your security is our top priority. Choose Windows Trade Plus for uncompromising protection and peace of mind.
